

Sarah A. Wilcox-Adelman

Sarah A. Wilcox-Adelman, Ph.D. received her degree in Physiology and Cell Biology in 1999 from Albany Medical College. She was a postdoctoral fellow at Massachusetts General Hospital/Harvard Medical School in the laboratory of Dr. Paul Goetinck from 1999-2003 and then was an Instructor in the same laboratory from 2003-2006. Dr. Wilcox-Adelman joined the Boston Biomedical Research Institute in 2006 as a Scientist. She has recently moved her laboratory to the Matrix Biology Institute. Dr. Wilcox-Adelman is interested in understanding the role of syndecan-4 in cell adhesion and migration and, in parallel, the role of hyaluronan in cancer cell migration.
