

Donald Gullberg

Donald Gullberg, Ph.D. has been trained as biochemist at the University of Uppsala, Sweden. After obtaining a Ph.D. at Uppsala University in 1990 on a thesis dealing with collagen-binding integrins he did a postdoc at UCLA in the laboratory of John and Lisa Fessler on a *Drosophila*-related project. Upon returning to Uppsala University in 1993 he became an independent researcher in the Department of Animal Physiology headed by Peter Ekblom. Since 2004 he is professor at Department of Biomedicine in Bergen, Norway. He heads a group of matrix biology and has a long-standing interest in collagen-binding integrins and their role in health and disease. 2011-2012 he spent a sabbatical year in the lab of Dr. Dean Sheppard, UCSF. Currently Dr. Gullberg is an Academic Editor of PLoS ONE.
